<b>Pull request:</b>	
<b>Description</b> Consider adding the ability to create a series of Red Hat Providers in a single org that can each represent a set of subscriptions from the Red Hat portal and possibly from different accounts.  Consider not actually calling it a 'Red Hat Provider' as well and instead some other type.  Also consider splitting providers from products so we can make it clear when multiple manifests effect the same product. ---- Imported from <a href="https://trello.com/c/rroUp3tm/175-3-design-out-how-we-can-handle-multiple-manifest-imports-from-different-accounts-into-one-organization_">https://trello.com/c/rroUp3tm/175-3-design-out-how-we-can-handle-multiple-manifest-imports-from-different-accounts-into-one-organization_</a>
