Foreman - Bug #5397

Architectures filter blows up if an organization is selected

04/22/2014 03:46 PM - Eric Helms

Status:	Duplicate		
Priority:	Normal		
Assignee:			
Category:	Users, Roles and Permissions		
Target version:			
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:	1098709	**Red Hat JIRA:**	
Pull request:			

Description

1. Create new role
2. New Filter
3. Select 'architectures' resource type
4. Add all permissions
5. Click 'submit'
6. Assign role to a user without any roles
7. Log in as that user
8. See 'Architectures' link and attempt to select
9. Get the following errors:

If on another Foreman page:

"Invalid search query: Field 'organization_id' not recognized for searching!"

Try to go to /architectures directly:

ActionController::RedirectBackError in ArchitecturesController#index

No HTTP_REFERER was set in the request to this action, so redirect_to :back could not be called successfully. If this is a test, make sure to specify request.env["HTTP_REFERER"].
Rails.root: /home/ehelms/workspace/foreman

- Blocks Tracker #4552: New permissions/authorization system issues added

#2 - 04/22/2014 03:56 PM - Dominic Cleal

- Category set to Users, Roles and Permissions

So this search string is something you added, with organization_id?

#3 - 04/22/2014 04:09 PM - Marek Hulán

I can imagine this can happen if you have filter for taxonomied resource, select some of them (automatically when you're in some context) and later you change the resource of this filter, taxonomies could remain assigned even if this resource does not support them.
