History

#1 - 04/25/2014 12:40 PM - Lukas Zapletal

- Category set to Packaging
- Target version set to 1.8.3

<https://github.com/theforeman/foreman-selinux/pull/15>

Added to existing PR.

#2 - 04/25/2014 01:15 PM - Dominic Cleal

- Status changed from Ready For Testing to New

This should be filed against the base OS in my opinion, it looks like Postfix is searching /var/lib and hitting /var/lib/puppet or something, rather than the puppetmaster trying to do something and being denied.

#3 - 04/28/2014 08:09 AM - Lukas Zapletal

- Status changed from New to Rejected

Of course, need more sleep these days.

#4 - 04/29/2014 05:50 PM - Dominic Cleal

- Target version deleted (1.8.3)
