Description	
According to Ohad: there is already a rack task to generate a debian package, maybe that would be an easy feature request to add (automate the generation of a RPM packages based on the cloned GIT source code).	

History

#1 - 06/19/2011 03:53 AM - Ohad Levy

any takers on this one?

#2 - 06/17/2012 06:56 AM - Ohad Levy

- Project changed from Foreman to Packaging

#3 - 12/06/2012 11:18 AM - Greg Sutcliffe

- Status changed from New to Closed

I don't think we need this now - the rake task doesn't exist for debian any more, and we have jenkins for package building, and nightlies as well. Closing this, re-open if you feel strongly about it :)
