

Katello - Feature #5532

As a user, I should only see entities I have access to within Content Search.

Revision fc9a0872 - 05/21/2014 01:31 AM - Eric Helms

Fixes #5532: Wraps content search in Foreman permission system.

Basic ideas of how content search is wrapped in permissions:

If you have `:view_products` and `:view_lifecycle_environments` on Library you can see all the products, repositories, errata, puppet modules and packages that you have view access on.

If you have `:view_content_views` and `:view_lifecycle_environments` you can see all the content views and subsequent products, repositories, errata, puppet modules and packages that you have view access on in the environments that you have view access on. This does not include the default content view. See the previous comment on how to see the default content view.
