

## Foreman - Bug #5573

### Statistics link for OS results in field 'os\_description' not recognized for searching

05/05/2014 03:22 PM - Edwin Starkey

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> Ori Rabin	
<b>Category:</b> Statistics	
<b>Target version:</b> 1.7.0	
<b>Difficulty:</b> trivial	<b>Fixed in Releases:</b>
<b>Triaged:</b>	<b>Found in Releases:</b> 1.4.3
<b>Bugzilla link:</b>	<b>Red Hat JIRA:</b>
<b>Pull request:</b> <a href="https://github.com/theforeman/foreman/pull/1946">https://github.com/theforeman/foreman/pull/1946</a>	
<b>Description</b> To reproduce, view the 'All hosts' page, then enter a filter such as: os_description="RHEL Server 6.4"  This error is displayed: Field 'os_description' not recognized for searching!  When you view the Statistics page and click an element of the "OS Distribution" pie chart, you are directed to the 'All hosts' page with the aforementioned filter.  This functionality used to work in a previous version. Sorry, I don't remember which one, probably 1.3.

Fixes #5573 - os search definitions for host available in unattended=false mode

(cherry picked from commit 7c3c0594afc76abbd6e684ef24c683d9d65e760e)

#### History

##### #1 - 05/06/2014 07:55 AM - Dominic Cleal

- Status changed from New to Need more information

Do you have :unattended set to true or false in /etc/foreman/settings.yaml?

##### #2 - 05/06/2014 03:13 PM - Edwin Starkey

The 'unattended' setting is false.

##### #3 - 05/06/2014 03:20 PM - Dominic Cleal

- Subject changed from Field 'os\_description' not recognized for searching to Statistics link for OS results in field 'os\_description' not recognized for searching

- Status changed from Need more information to New

- Difficulty set to trivial

Thanks, that's what I suspected.. seems the OS related search definitions are only in the unattended=true section of app/models/concerns/hosttext/search.rb, but probably shouldn't be.

- Related to Bug #8043: Statistics link to OS is wrong added

**#7 - 10/23/2014 06:22 AM - Dominic Cleal**

It's not exactly a duplicate, but maybe we can fix it at the same time. This only happens in unattended=false mode, which exposes different OS search options.
