

Katello - Bug #5596

Client Registration fails "Current user not set"

05/06/2014 08:01 PM - Justin Sherrill

Status: Closed	
Priority: Urgent	
Assignee: Justin Sherrill	
Category:	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Trying to register a client: subscription-manager register --org=ACME_Corporation --environment=Library fails with error: "Current user not set" Traced this down and its related to commit cb6b5bda884e6dae3806c2acd8db52433cddcdc3 The authorize call is occuring after find_environment_and_content_view which uses permissions to lookup the environment and content view.	

Associated revisions

Revision ad95493b - 05/07/2014 01:47 AM - Justin Sherrill

fixes #5596 - fixing errors on system registration

a readable? call was occurring prior to authorized being called
Since readable? is not even the correct permission, and the
consumer_create actions handles its own permissions checking
registerable?.

The only other action that uses it is hypervisors_update,
but since this is using consumer auth, it was ignoring the
check completely

Revision 39630a7b - 05/07/2014 12:52 PM - Justin Sherrill

Merge pull request #4054 from jsherrill/reg

fixes #5596 - fixing errors on system registration
