

Katello - Bug #5605

activation-key commands resulting in "has_key?" error

05/06/2014 09:01 PM - Brad Buckingham

Status: Closed	
Priority: Normal	
Assignee: Brad Buckingham	
Category: Hammer	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>If an activation-key doesn't have an environment or content view assigned, attempting to execute certain commands (e.g. activation-key list, activation-key info) will result in an error to the user.</p> <p>The error is: NoMethodError (undefined method `has_key?' for nil:NilClass):</p> <p>This may be related to the feature that was recently introduced to allow the keys to 'optionally' included env/view. Previously, they were required.</p>	

History

#1 - 05/09/2014 06:59 PM - Brad Buckingham

- Assignee set to Brad Buckingham
- Target version set to 44
- Triaged changed from No to Yes

#2 - 05/28/2014 05:39 PM - Eric Helms

- Status changed from New to Closed

#3 - 05/28/2014 06:49 PM - Brad Buckingham

- % Done changed from 0 to 100

This was addressed as part of the following PR:
