Katello - Bug #5606

activation-key (host-collection) add-system-group doesn't work

05/06/2014 09:04 PM - Brad Buckingham

Status:	Closed		
Priority:	Normal		
Assignee:

Target version:	Katello 2.0		
Difficulty:		**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:		**Red Hat JIRA:**	
Pull request:			

Description

(Note: system-group is in the process of being renamed to host-collection)

The following commands may report success to the user; however, the system group is not actually associated with the activation key.

Example commands:
activation-key add-system-group --organization-id ACME_Corporation --name key1 --system-group-id 5
activation-key add-system-group --organization-id ACME_Corporation --id 1 --system-group-id 5

Response to the user:
The system group has been associated

- Status changed from New to Closed

Testing this out with latest master code today, this appears to be working ok. Going to close it out.

```
hammer> activation-key add-host-collection --id 6 --host-collection-id 9
The host collection has been associated
hammer> activation-key info --id 6
Name:                  key2
ID:                    6
Description:
Lifecycle Environment:
Content View:
Host Collections:
 1) ID:    9
    Name: group2
 2) ID:    16
    Name: group5

hammer>
