

Katello - Bug #5626

Env selection doesn't persists when we update env of selected activation-key

05/07/2014 08:06 PM - Thomas McKay

Status: Closed	
Priority: Normal	
Assignee: Thomas McKay	
Category: Web UI	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1089637	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1089637	
Description of problem:	
I created an activation-key with default env 'Library' and default content view. Later I created an env 'dev' and created a 'cv1'. But when I tried to update the environment of selected activation key to 'dev', the selection doesn't persists on save. UI always select 'Library' as an env even if we choose 'dev' env (along with an CV in that env)	
Version-Release number of selected component (if applicable):	
Satellite-6.0.3-RHEL-6-20140404.0

How reproducible:
always

Steps to Reproduce:

1. Create a activation key with default env as 'Library' and default cv too
2. create a new env 'dev' and promote a CV to dev
3. now update created activation-key's env and select 'dev' and then created cv under dev.
4. when you save the changes, UI again select the 'Library'

Actual results:

Env selection doesn't persists when we update env of selected activation-key

Expected results:

UI should show updated env.
