Description

I couldnt create a new host after specifing a valid name without periods

Foreman version : 1.4.2
Error : must not include periods and is invalid
:unattended: set to true

History

#1 - 05/09/2014 07:58 AM - Dominic Cleal

- Status changed from New to Need more information

Names should be fully qualified, either add an FQDN (e.g. foo.example.com) or enter a short name and specify a domain on the Network tab.

#2 - 06/06/2014 05:27 PM - Dominic Cleal

- Is duplicate of Bug #5834: Hosts: "." in the name is invalid - user is told this but the UI adds one anyway. added

#3 - 06/06/2014 05:28 PM - Dominic Cleal

- Status changed from Need more information to Duplicate
