Description Currently running rake katello:reset is broken on a devel deploy. In lib/katello/tasks/setup.rake "cpdb --drop --create" is called, but since candlepin does not have permissions to remove and create dbs, this fails. A workaround is: sudo -u postgres psql ALTER USER candlepin WITH SUPERUSER;

Revision 73f509f3 - 05/21/2014 01:36 AM - Eric Helms

Refs #5681: Candlepin reset only needs to drop, create and migrate the database.

Previously, we used cpdb and cpsetup to manage the Candlepin database, cert and configuration file deployment when running Katello reset. With the installer handling the cert and configuration file, we need only to drop, create and migrate the Candlepin database when resetting.

Revision 0f8b1b43 - 05/21/2014 08:08 AM - Eric Helms

Refs #5681: Gives candlepin DB user superuser to allow katello dev reset task to work.

History

#1 - 06/02/2014 12:54 PM - Eric Helms

- Target version set to 45
- Triaged changed from No to Yes

#2 - 06/02/2014 12:55 PM - Eric Helms

- Status changed from New to Assigned
- Assignee set to Eric Helms

#3 - 06/11/2014 05:06 PM - Eric Helms

- Status changed from Assigned to Closed

Development deployments are now able to reset without any additional work by the developer after deployment.
