| Description Some of the cases that need to be fixed Given view on a particular environment, 1) The v2/environments index call needs to only return that environment 2) The v2/paths call needs to return a list of all environments in that path with a permissions marking the environments readable or not. 3) UI in the activations keys/promotions/environments page needs to use that readable flag and based on that disable viewing of the details of that environment. 4) Hammer paths command needs to also make use of this information and display information appropriately. | |

Revision a8e4abc2 - 05/15/2014 05:00 PM - Partha Aji

Fixes #5682 - Handle Lifecycle env read perms better

- 1) Made env index call prune the return list based on read perms
- 2) Made the env page in the UI display paths appropriately based on read perms
- 3) Updated the create env call to require read access on the prior environment before one can create.

Revision 6790773a - 05/15/2014 09:00 PM - Partha Aji

Fixes #5682 - Handle Lifecycle env read perms better

- 1) Made env index call prune the return list based on read perms
- 2) Made the env page in the UI display paths appropriately based on read perms
- 3) Updated the create env call to require read access on the prior environment before one can create.

Revision 5a90c08c - 05/16/2014 10:43 AM - Partha Aji

Merge pull request #4102 from parthaa/env-read

Fixes #5682 - Handle Lifecycle env read perms better
