Description		
<p>When updating parameters, if there is an "array" param that has successfully validated when updating other parameters I get the error:</p> <p>Warning!</p> <p>Validation failed: Value is invalid array</p> <p>I think this is because Foreman is escaping the JSON in the array again (double escape) which makes it invalid.</p> <p>See attached screenshot for example.</p> <p>Stack trace is:</p> <pre>ActiveRecord::RecordInvalid Validation failed: Value is invalid array app/models/concerns/host_common.rb:34:in `block in lookup_values_attributes=' app/models/concerns/host_common.rb:27:in `each_value' app/models/concerns/host_common.rb:27:in `lookup_values_attributes=' app/controllers/hosts_controller.rb:112:in `block in update' app/models/taxonomy.rb:49:in `block in no_taxonomy_scope' app/models/taxonomy.rb:56:in `block (2 levels) in as_taxonomy' app/models/concerns/foreman/thread_session.rb:143:in `as_location' app/models/taxonomy.rb:55:in `block in as_taxonomy' app/models/concerns/foreman/thread_session.rb:108:in `as_org' app/models/taxonomy.rb:54:in `as_taxonomy' app/models/taxonomy.rb:48:in `no_taxonomy_scope' app/controllers/hosts_controller.rb:104:in `update' app/models/concerns/foreman/thread_session.rb:33:in `clear_thread' lib/middleware/catch_json_parse_errors.rb:9:in `call'!!!</pre>

My bad, screenshot attached this time

#2 - 05/13/2014 11:05 AM - Dominic Cleal

- Status changed from New to Feedback

I think this is bug [#4639](#), as the screenshot shows a Ruby style hash (with => separators rather than : for JSON) when you're editing it.

Please try Foreman 1.4.4 which contains the fix: <http://theforeman.org/manuals/1.4/index.html#Releasenotesfor1.4.4>

#3 - 05/13/2014 11:08 AM - Ollie Lawson

Thanks Dominic, I'll update my version now and check.
