Description

I have upgraded following the steps at http://theforeman.org/manuals/1.5/index.html#3.6Upgrade and now after login (as admin) in I get:

Warning!
undefined method `avatar_hash' for #<User:0x000000081e1d30>

Stack trace is:
NoMethodError

This looks like the database migration didn't run, and/or Foreman needs a restart to pick up on it. Please try:

- foreman-rake db:migrate
- foreman-rake db:seed
- service httpd restart (or service apache2 restart on Debian/Ubuntu)

Hi Dominic,

I've run the rake commands and in all instances I get:

[root@puppet public]# pwd
/var/lib/foreman/public
[root@puppet public]# foreman-rake db:migrate
could not open session
[root@puppet public]#

Any ideas?

Thanks

Can you check permissions on your /etc/pam.d files are correct? The error suggests that "su" isn't working on your system.

```
-rw-r--r--. 1 root root 487 Apr 17  2012 /etc/pam.d/su
-rw-r--r--. 1 root root 202 Nov 22 12:51 /etc/pam.d/sudo
-rw-r--r--. 1 root root 187 Nov 22 12:51 /etc/pam.d/sudo-i
-rw-r--r--. 1 root root 137 Apr 17  2012 /etc/pam.d/su-l
lrwxrwxrwx. 1 root root  14 Sep 11  2013 /etc/pam.d/system-auth -> system-auth-ac
-rw-r--r--. 1 root root 937 Sep 11  2013 /etc/pam.d/system-auth-ac
```

Thanks Dominic,

It was a pam issue but not related to Puppet/Foreman.
