Linked [#6210](#) which is likely a duplicate, or a very similar issue.

I'm almost certain it's a duplicate, because I've noticed myself now in a few places that the counter caches are fragile. When writing directly to the DB, they don't get updated, and I have a feeling there's something else fishy going on. I doubt it's simple.

What do you think about a rake task that will at least correct the wrong counts until we figure it out?

Can do, if it can be done simply. I think having this will be useful anyway.
