Description 1) Login to Katello 2) Select an org 3) Goto Content -> Content Views 4) Pick a content view. Now hover over content menu and hover over "Lifecycle Environments". Notice the URL it points to.. "http://<fqdn>/content_views/2/lifecycle_environments" instead of "http://<fqdn>/lifecycle_environments"

This bug causes infinite reloads to happen. Another example

- 1) Goto Activation Keys -> New
- 2) Select Content -> Lifecycle Environments (Notice the wrong URL.)
- 3) The page keeps reloading trying to load http://<fqdn>/activation_keys/lifecycle_environments

This bug also occurs when you go to http://<fqdn>/activation_keys/ or http://<fqdn>/content_views/ (the / at the end is important here to repro this issue)
