

## Foreman - Bug #5699

### The "location\_fact" setting does not actually look for a custom fact

05/13/2014 07:02 PM - Simon Mügge

<b>Description</b>	
<p>The new "location_fact" setting to automatically update a hosts location to the therein configured fact does not get evaluated.</p> <p>It always and only looks for a fact named "location_fact", not for "foreman_location", which is the in-page default in the admin settings page, nor any other configured custom fact.</p> <p>The issue seems to be this, as was pointed out in IRC today by either "Dominic" or "acidrainfall": <a href="http://projects.theforeman.org/projects/foreman/repository/revisions/e88536b278c403ae2e0e34f0e0e2de457bf95383/entry/app/models/host/base.rb#L112">http://projects.theforeman.org/projects/foreman/repository/revisions/e88536b278c403ae2e0e34f0e0e2de457bf95383/entry/app/models/host/base.rb#L112</a></p>
