History

#1 - 05/20/2014 05:53 PM - Eric Helms

- Subject changed from Index methods should be scoped by organization_id when present under new permission system. to Index methods should be properly scoped by organization under new permission system.

During the permission system transition, the reliance on current organization was removed from the authorization layer. Thus, all controllers expected to be scoped by organization need to ensure that it is both present and correctly handled by the index methods.
