

Foreman - Bug #5750

Cannot set default_organization_id at user creation

05/15/2014 07:47 PM - dustin tsang

Status: Rejected	
Priority: Normal	
Assignee: dustin tsang	
Category: API	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1092656	Red Hat JIRA:
Pull request:	
Description https://bugzilla.redhat.com/show_bug.cgi?id=1092656 Created attachment 890865 [details] part of /var/log/foreman/production.log Description of problem: Creation of a user via API with default_organization_id set fails with 500 ISE. Version-Release number of selected component (if applicable): Satellite-6.0.3-RHEL-6-20140423.1-Satellite-x86_64-dvd1.iso How reproducible: always Steps to Reproduce: 1. Run @api.resource(:users).call(:create, user_hash) with following user_hash: user_hash = { :login => "newuser", :firstname => "user", :lastname => "new", :mail => "root@localhost", :auth_source_id => 1, :password => "password", :organization_ids => [13], :default_organization_id => 13, :location_ids => [], :role_ids => [], } Actual results: Creation of user failed with: 500 Internal Server Error: { "error": {"message": "undefined method `key?' for #<JSON::Ext::Generator::State:0x007f696cecadd8>"} } but the user was created! Expected results: no exceptions or ISEs Additional info: - creating of the user without default_organization_id works and setting it using the user update API afterwards works as well

History

#1 - 05/16/2014 03:11 PM - Dominic Cleal

- Project changed from Katello to Foreman
- Category set to API
- Status changed from New to Ready For Testing
- Assignee set to dustin tsang
- Target version set to 1.8.3

<https://github.com/theforeman/foreman/pull/1450>

#2 - 05/19/2014 12:39 PM - Anonymous

- Target version changed from 1.8.3 to 1.8.2

#3 - 05/20/2014 05:11 PM - Dominic Cleal

- Has duplicate Bug #5666: Cannot set default_organization_id at user creation added

#4 - 05/23/2014 03:59 PM - dustin tsang

The server is no longer giving a 500 internal error but a proper validation but proper validation is given. Validation message and an example of a successful creation of a user can be seen in the link.
