<b>Pull request:</b>		

#### Description

Cloned from [https://bugzilla.redhat.com/show\\_bug.cgi?id=1097575](https://bugzilla.redhat.com/show_bug.cgi?id=1097575)

Description of problem:

Hammer content-host list command has --name option to filter the list by name. But it doesn't work. I passed the shost.katellolabs.org name so output should show just one entry.

```
[root@dhcp201-170 ~]# hammer content-host list --organization ACME_Corporation --name shost.katellolabs.org
```

```
-----|-----  
ID          | NAME  
-----|-----  
cbd4ed98-12a2-4d9d-a602-2f7ec8e9407c | shost.katellolabs.org  
5be37de7-3da9-4810-9f7e-2e905114a28f | provisionhttp.katellolabs.org  
d3dab85f-0b50-4217-bf45-b816f398aa40 | lucky9.katellolabs.org  
-----|-----
```

However, filtering the list with --uuid works fine:

```
[root@dhcp201-170 ~]# hammer content-host list --organization ACME_Corporation --uuid  
cbd4ed98-12a2-4d9d-a602-2f7ec8e9407c
```

```
-----|-----  
ID          | NAME  
-----|-----  
cbd4ed98-12a2-4d9d-a602-2f7ec8e9407c | shost.katellolabs.org  
-----|-----
```

How reproducible:  
always

Steps to Reproduce:

1. hammer content-host list --organization ACME\_Corporation --name <name\_of\_host>
- 2.
- 3.

Actual results:

filtering the list by name doesn't work

Expected results:

filtering by name should work
