fixes #582 - Foreman should not fail if libvirt ruby binding are not installed

History

#1 - 01/22/2011 12:38 AM - Ohad Levy

just for general info, the ruby-libvirt package is required (and a package is avail for most platforms -- see more details here [Virtual Machine Provisioning](#))

if the error you get is that virt is missing and you are using source, you should follow the [Upgrade instructions](#)

- File 0001-Fixes-bug-582-make-dependency-on-libvirt-optional-th.patch added

Since I currently don't use the virtual machine provisioning features of Foreman and don't want to depend on virt and libvirt, I tried to decouple Foreman from these dependencies.

The attached patch is working on my development setup but it probably needs some more testing.

#3 - 02/08/2011 03:52 PM - Chad Huneycutt

This patch did not work for me exactly. I had to comment out the config.gem 'virt' and 'libvirt' in config/environment.rb. I also had to comment out the 'require libvirt' in vendor/plugins/virt/lib/virt/connection.rb.

#4 - 03/21/2011 11:54 AM - Ohad Levy

- Status changed from New to Ready For Testing

- % Done changed from 0 to 100

Applied in changeset [ba5b7e74e0b0f8b7efcb8804f77c810031a6aeba](#).

#5 - 03/21/2011 02:04 PM - Ohad Levy

- Status changed from Ready For Testing to Closed
