

Katello - Feature #5821

Capsule content manipulation over API/CLI

05/20/2014 01:44 PM - Ivan Necas

Status: Closed	
Priority: Normal	
Assignee: Ivan Necas	
Category:	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description As a capsule user I want to be able to use API/CLI to add environments to the capsule and synchronize the capsule.

History

#1 - 05/20/2014 01:53 PM - Ivan Necas

By now, the capsule is considered to be the same a proxy, therefore I've build the capsules entry point, that uses the smart proxy on backend, but uses the capsule wording for convenience.

I've added the following API

GET /api/capsules - list the capsules

GET /api/capsules/:id - hos the capsule details

GET /api/capsules/:id/content/lifecycle_environments - environments attached to the capsule for syncing content

POST /api/capsules/:id/content/lifecycle_environments - attach lifecycle environment to the capsule (hamm

DELETE /api/capsules/:id/content/lifecycle_environments/:environment_id - remove lifecycle environment from the capsule

POST /api/capsules/:id/content/sync - synchronize the capsule (optionally, one can limit the synchronization to one environemnt with environment_id)

The corresponding hammer commands are:

```
hammer capsule list
hammer capsule info --id 1
hammer capsule content lifecycle-environments --id 1
hammer capsule content add-lifecycle-environment --id 1 --environment-id 1
hammer capsule content remove-lifecycle-environment --id 1 --environment-id 1
hammer capsule content synchronize --id 1
hammer capsule content synchronize --id 1 --environment-id 1
```
