History

#1 - 05/20/2014 02:31 PM - Dominic Cleal

- Tracker changed from Bug to Feature
- Subject changed from cron job `foreman-rake reports:summarize` results in "rake aborted! getaddrinfo: Name or service not known" to Configure Rails email settings
- Category set to Foreman modules

This perhaps should include updating the default email.yml file distributed in core, please evaluate as a whole.

#2 - 09/23/2014 07:46 AM - Stephen Benjamin

- Related to Tracker #7585: Mail notifications tracker added

#3 - 10/17/2014 01:49 PM - Stephen Benjamin

User contributed some documentation related to email.yml which is really useful:

<https://github.com/foreman/foreman.org/pull/280/files>

Is documentation sufficient for this issue or do we want to add some options to the installer to configure email.yml?

#4 - 10/20/2014 03:50 AM - Dominic Cleal

I'd like the installer to support it too, but the docs are very helpful indeed.

#5 - 04/20/2015 05:22 AM - Dominic Cleal

- Has duplicate Feature #10179: Add email configuration settings to installer added

#6 - 04/20/2015 07:58 AM - Bryan Kearney

- Bugzilla link changed from 1080617 to 1188346

#7 - 12/01/2015 08:15 AM - Dominic Cleal

- Status changed from New to Resolved
