

Installer - Feature #5824

Configure Rails email settings

05/20/2014 02:29 PM - Dominic Cleal

Status: Resolved	
Priority: Normal	
Assignee:	
Category: Foreman modules	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1188346	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1080617	
Description of problem: Cron job `foreman-rake reports:summarize` results in "rake aborted! getaddrinfo: Name or service not known" on default installation.	
Version-Release number of selected component (if applicable): Satellite-6.0.3-RHEL-6-20140321.2	
How reproducible: always	
Steps to Reproduce: 1. One of the cron jobs have: /usr/sbin/foreman-rake reports:summarize	
Actual results: 1. /usr/sbin/foreman-rake reports:summarize rake aborted! getaddrinfo: Name or service not known	
Tasks: TOP => reports:summarize (See full trace by running task with --trace) 1. echo \$? 1	
Expected results: On default installation, all should work - cron jobs should not produce errors periodically	
Additional info: This was initially reported as: http://projects.theforeman.org/issues/4833	
As per http://projects.theforeman.org/projects/foreman/wiki/Email_configuration I have configured this:	
1. cat /etc/foreman/email.yaml 2. Outgoing email settings	
production: delivery_method: :sendmail	
but that generates mails for root@\$(hostname -d) so they have permanent errors in my case, but I guess this can be configured somewhere as well.

History

#1 - 05/20/2014 02:31 PM - Dominic Cleal

- Tracker changed from Bug to Feature

- Subject changed from cron job `foreman-rake reports:summarize` results in "rake aborted! getaddrinfo: Name or service not known" to Configure Rails email settings

- Category set to Foreman modules

This perhaps should include updating the default email.yml file distributed in core, please evaluate as a whole.

- Related to Tracker #7585: Mail notifications tracker added

#3 - 10/17/2014 01:49 PM - Stephen Benjamin

User contributed some documentation related to email.yml which is really useful:

<https://github.com/foreman/foreman.org/pull/280/files>

Is documentation sufficient for this issue or do we want to add some options to the installer to configure email.yml?

#4 - 10/20/2014 03:50 AM - Dominic Cleal

I'd like the installer to support it too, but the docs are very helpful indeed.

#5 - 04/20/2015 05:22 AM - Dominic Cleal

- Has duplicate Feature #10179: Add email configuration settings to installer added

#6 - 04/20/2015 07:58 AM - Bryan Kearney

- Bugzilla link changed from 1080617 to 1188346

#7 - 12/01/2015 08:15 AM - Dominic Cleal

- Status changed from New to Resolved
