Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1082181
Description of problem:
If you have a whole lot of org names, it can be cumbersome to find it in the scrollbox as seen at "Any Context > Any Organization".

It would be a Very Nice to Have to be able to

a) type in a string somewhere here that would filter choices by all orgs that match entered string, or

b) simply hotkey down to the first matching org in the list -- so if user has an org called, "BigCorpInc", typing "Big" while in the scrollbox would nav down to the appropriate first org that matches the keystrokes.
