Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1051580
If the kickstart file is generated with Spaces, then the following is generated in the kickstart file:

Assume Activtion Key Name is "A Test Key"

subscription-manager regiseter --activationkey A Test Key

This fails, since Test and Key are parsed as options. It needs to have quotes to make it work.
