Pull request:		
Description <p>Plugin foreman-tasks creates this directory on-the-fly if it does not exist. For better SELinux support, we should carry this directory, so we can label it and files within.</p> <p>For now let's just carry the directory, I will leave the domain as foreman_var_run_t and later on (e.g. for Foreman 1.6) we can tighten the policy.</p>		

History

#1 - 05/22/2014 11:53 AM - Lukas Zapletal

- Status changed from Assigned to Ready For Testing

<https://github.com/theforeman/foreman/pull/1468>

#2 - 06/02/2014 09:04 AM - Lukas Zapletal

- Status changed from Ready For Testing to Rejected

Leaving the default domain for now.

#3 - 06/02/2014 09:17 AM - Dominic Cleal

- Target version deleted (1.8.2)
