<b>Description</b> <a href="https://tickets.puppetlabs.com/browse/PUP-2582">https://tickets.puppetlabs.com/browse/PUP-2582</a> improved security of the Debian/Ubuntu puppetmaster/passenger packages, we should ensure both puppet-puppet and puppet-foreman have reasonable TLS settings that match Puppet upstream.		

History

#1 - 10/02/2014 05:59 AM - Dominic Cleal

- Status changed from New to Closed
- Assignee set to Ewoud Kohl van Wijngaarden
- Target version set to 1.7.2
- translation missing: en.field\_release set to 21

<https://github.com/theforeman/puppet-puppet/commit/9d67e686ea48019c42cafa85402d6efc6db27854> fixed the Puppet vhost to match upstream. Foreman's vhost has reasonable defaults from puppetlabs-apache - we'll simply inherit any security hardening that this module receives.
