Smart Proxy - Bug #5902

VMware profile for disk doesn't stick

05/23/2014 09:38 AM - Jon Skarpeteig

Status:	Duplicate

Pull request:			

Description

Editing compute profile for VMware under Storage doesn't save/read properly.

Example:

Changing data store, and size fields - hit submit
Editing the same profile again shows default values under Storage section. (Top datastore in list and 10GB harddrive size)

The same is seen for hosts using this profile.
