Pull request:	
Description	
In better support masterless Puppet, and still rely on Puppet SSL authentication, it would be ideal to extend the authorization of uploading facts to also allow a host to upload its own facts and reports.

Can we also have access to other info from foreman based on machine certificates?

For example it will be useful to have access to [https://\\$FOREMAN_URL/hosts/\\$CERTNAME/externalNodes?name=\\$CERTNAME](https://$FOREMAN_URL/hosts/$CERTNAME/externalNodes?name=$CERTNAME) for use in facter or other custom scripts.

Thank you.
