

Foreman - Bug #5969

deleting of EC2 guests - confusing message

05/28/2014 01:59 PM - Dominic Cleal

Status: Closed	
Priority: Low	
Assignee: Joseph Magen	
Category: VM management	
Target version: 1.6.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link: 1102085	Red Hat JIRA:
Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1102085	
Description of problem: We have a EC2 guest in Sat6.0. When we delete it, we get a information message "Successfully deleted", but the guest is still contained in EC2 (and in "Compute Resource" > "Virtual Machines"). Amazon deletes guest with the delay (in my case 10 - 60 min). it means, the message is inaccurate. It would be better something as "The virtual machine will be deleted in few minutes".	
Question is it, the difference between the deleting of host ("Hosts" > "All hosts" > delete some of EC2 guests) and deleting of a virtual machine ("Infrastructure" > "Compute resource" > some of EC2 resources > "Virtual Machines" > some of EC2 guests).	
First option deletes the host immediately and VM will be automatically deleted in future. In this case, the message is acceptable, we don't see already host in list.	
Second option marks VM for deleting and VM will be automatically deleted in future. In this case, the message is confusing, because we see still the VM in list.	
Version-Release number of selected component (if applicable): Satellite-6.0.3-RHEL-6-20140523.0	
How reproducible: 100%	
Steps to Reproduce: 1. We have got Sat 6.0 with some EC2 guest. 2. Open detail of VM guest "Infrastructure" > "Compute resource" > some of EC2 resources > "Virtual Machines" > some of EC2 guests 3. Click on the "Delete" button. 4. We can see message "Successfully deleted", but VM is still in the list.	
Actual results: "Successfully deleted"	
Expected results: "The virtual machine will be deleted in a few minutes"
