

Katello - Bug #5980

katello install not allowing admin/changeme login in foreman

05/29/2014 05:12 AM - Ignacio Bravo

Status: Closed	
Priority: Normal	
Assignee:	
Category: Installer	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
From a fresh CentOS installation:	
1. yum install -y git ruby rubygems	
2. git clone https://github.com/Katello/katello-deploy.git	
3. cd katello-deploy	
[workaround Bug #5961]	
4. cp scl.repo /etc/yum.repos.d/scl.repo	
5. yum -y localinstall http://yum.theforeman.org/nightly/el6/x86_64/foreman-release.rpm	
6. yum -y install foreman-selinux	
7. vim /etc/hosts and add FQDN to list	
8. ./setup.rb centos6 --skip-installer	
9. katello-installer --foreman-authentication=true --capsule-tftp=true -v	
Results:	
some errors are noted during installation time.	
when login into foreman through http://localhost/katello user admin/changeme errors with incorrect username or password.	
Errors:

History

#1 - 05/29/2014 06:59 PM - Ignacio Bravo

Did a new install a couple of hours ago and the problem dissapeared.

Please close the case.
