Target version:	1.7.1	
Difficulty:		
Triaged:		
Bugzilla link:		
Pull request:	https://github.com/foreman/foreman/pull/1932	
Description		
<p>Hello,</p> <p>When creating a new host on an amazon compute resource and choosing for the "Managed IP" Public, no real IP is assigned to the machine.</p> <p>We are using VPCs and not EC2.</p> <p>We have a "nat" role that should also use some awscli commands in order to configure itself. Because no real IP is assigned, those commands timeout and fail, so we need to manually add an IP and rerun puppet.</p> <p>I didn't see anything relevant in the logs, so please let me know if you want anything from our side regarding this.</p> <p>Best regards, Cristian Falcas</p>

History

#1 - 05/30/2014 12:56 PM - Dominic Cleal

- Category set to Compute resources

It's worth noting that the "Managed IP" is about which IP Foreman picks to try and contact the new VM on, rather than having any impact on how the VM is created and which IP it's allocated. I'm not sure how the latter works.

#2 - 05/30/2014 01:05 PM - cristian falcas

I was thinking about this feature more:

<http://docs.aws.amazon.com/AmazonVPC/latest/UserGuide/vpc-ip-addressing.html#vpc-public-ip>

Thank you for your response, please close this issue then.

#3 - 05/30/2014 01:10 PM - Dominic Cleal

- Tracker changed from Bug to Feature
- Subject changed from on amazon compute resource, choosing public ip is not working to Support assigning public IP to Amazon EC2 host

Let's rephrase it as a feature request :)

#4 - 05/30/2014 01:58 PM - cristian falcas

Thank you Dominic.
