Description

Subscription Manager is gettting an empty set of Orgs when calling GET /users/:login/list_owners

This affects the following in subscription-manager:
- GUI registration: Unable to register because there are no Orgs to select from.
- CLI orgs command: No orgs are returned for the target user.

It appears that the API call is being routed to the UsersController instead of the CandlepinProxiesController.

Fixes #6021 - Remove route mapping to UsersController

GET /users/:login/owners was being mapped twice.

Remove route to UsersController and allow it to route
to the CandlepinProxiesController.
