

Katello - Bug #6029

hammer repo list --product=<name> returns wrong repos

06/03/2014 12:41 AM - Partha Aji

Status: Closed	
Priority: Normal	
Assignee: Tomáš Strachota	
Category: Hammer	
Target version: Katello 2.0	
Difficulty:	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link: 1103945	Red Hat JIRA:
Pull request:	
Description	
<p>hammer repository list --product-id=2 --organization-id=1 works well and returns the repositories belonging to the product. OTOH</p> <p>hammer repository list --product=foo --organization-id=1 where foo is the name of the product, returns repositories belonging to all products in that organization.</p> <p>After some debugging it looks like the repositories controller never really gets a product_id sent as parameter when --product=foo is used.</p>
