Katello - Bug #6072

syncing repo with typo in URL creates lock

06/04/2014 09:56 PM - Ivan Necas

Status:	Closed		
Priority:	Normal		
Assignee:	Ivan Necas		
Category:	Web UI		
Target version:	Katello 2.0		
Difficulty:		**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:	1099981	**Red Hat JIRA:**	
Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1099981
Description of problem:
Syncing repo with typo in URL creates lock.

Version-Release number of selected component (if applicable):
Satellite-6.0.3-RHEL-6-20140521.0

How reproducible:
always

Steps to Reproduce:
1. Create new product in webUI:
Content -> Products -> [+ New Product]
Name: ISEProduct
2. Create new repository in the product:
Content -> Products -> ISEProduct -> [Create Repository]
Name: ISERepository
Type: yum
URL: http://www.redhat.com/notExistingRepo
3. Sync it (using Content -> Sync Status ... do not trigger this, just fails,
but I do not see the lock - strange (!))
Content -> Products -> ISEProduct -> ISERepository -> [Sync Now]
Also you can initialize sync using hammer.

Actual results:
Looks like some locks are left around.

Expected results:
Should fail without locks around or something.

Additional info:
To clean this, you have to release the lock:
Monitor -> Tasks -> <your_failed_task> -> [Force Stop] -> [Force Stop]

Revision 41214135 - 06/10/2014 05:06 AM - Ivan Necas

Fixes #6072 - Report issues on repo syncing and don't lock repository on failure

Repo synchronization is an idempotent operation. There are also
situations, such as wrong url, that might lead to unexpected
situations. Therefore, instead of keeping the task paused, locking
other operations to be performed, just skip the syncing and report the
errors.

The bastion task details page now also includes a link to "More
details" that leads to foreman_tasks/show page with even more details

information useful for debugging the issue and filing bugs.
