Katello - Bug #6078

-1 should not be used to represent "unlimited" for activation keys and host collections

Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1105175
Description of problem:

Created a host-collection whose value was set to '10' for content-host limit. Later, I updated the limit with "-1", as soon as I type "-1", the text box closes and points to "unlimited" checkbox.

So -1 shouldn't be allowed for content host limit.

Version-Release number of selected component (if applicable):
sat6 beta snap8 (Satellite-6.0.3-RHEL-6-20140604.0)

How reproducible:
always

Steps to Reproduce:
1. create host collection with limit 10
2. update the limit with -1
3.

Actual results:
on updating the limit with -1, ticks the checkbox to unlimited

Expected results:
user shouldn't be allowed to set limit to -1

Revision 607f4e7f - 07/08/2014 01:23 PM - Walden Raines

Fixes #6078, #6300, #6514, BZ1105175, BZ1097054, BZ1101586: fix limit fields

This commit changes the way we handle limited fields such as Content Host
number of systems and Activation Key usage limit. Instead of representing
"unlimited" as -1 we now represent it as a boolean on the object.

- Has duplicate Bug #6127: user shouldn't be allowed to update the content-host limit to -1 for selected host-colection added

#3 - 06/16/2014 02:58 PM - Eric Helms

- Target version deleted (45)

#4 - 06/25/2014 06:29 PM - Walden Raines

- Subject changed from user shouldn't be allowed to update the content-host limit to -1 for selected host-colection to -1 should not be used to represent "unlimited"

- Priority changed from Low to Normal

- Target version set to 49

Changing summary this to reflect system-wide nature of problem.

For both activation keys and host collections we should not use -1 to represent "unlimited". This issue captures the following work:

- Fix the client side UI so that only > 1 limits can be sent
- Fix the server side so that "unlimited" is represented as a boolean and that limit is ignored if true
- Check that candlepin integration still works

#5 - 06/25/2014 06:30 PM - Walden Raines

- Subject changed from -1 should not be used to represent "unlimited" to -1 should not be used to represent "unlimited" for activation keys and host collections
