Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1095925
Now that we have the ability to specify a default Organization and Location within a user's account we should send any systems being registered without an --organization parameter to land in these specified organizations.

This allows for parameter-less registrations to work:

1. subscription-manager register

Associated revisions

Revision 71400565 - 06/06/2014 06:52 PM - Eric Helms

Fixes #6080, #6081, #6082: Fixing registration including adding back default organization.

Addresses the following BZs: BZ1103020, BZ1095925, BZ1096068

Addresses a number of issues that have crept up recently with registration
and attempts to support the following:

1. User specifies an organization.   * User must belong to the organization   * The consumer will register to the Library of that organization.

2. User does not specify an organization.   * User must have a default organization set.   * The consumer will register to the Library of the users default
organization.

3. User specifies an organization and an environment.   * The user must belong to the organization   * The user must have view on the environment   * The user must have create on content hosts in that organization
