Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1103073 Description of problem: Description of options given under host-collection subcommands should be more clear and descriptive. For ex: [root@dhcp207-55 ~]# hammer host-collection remove-content-host --help Usage: hammer host-collection remove-content-host [OPTIONS] Options: --id ID --name NAME Name to search by --organization ORGANIZATION_NAME --organization-id ORGANIZATION_ID --organization-label ORGANIZATION_LABEL --system SYSTEM_NAME --system-id SYSTEM_ID -h, --help print help Please make it more user friendly. User should understand all options by their description. here --id should have description like: ID of host-collection[required] --name should have description Name of host-collection --system Name of system There are other areas as well which are not clear. like: [root@dhcp207-55 ~]# hammer host-collection content-hosts --help Usage: hammer host-collection content-hosts [OPTIONS] Options: --activation-key ACTIVATION_KEY_NAME --activation-key-id ACTIVATION_KEY_ID --id ID Id of the host collection --organization ORGANIZATION_NAME --organization-id ORGANIZATION_ID --organization-label ORGANIZATION_LABEL --system SYSTEM_NAME --system-id SYSTEM_ID -h, --help print help here what's the purpose of --system, assuming to list/search the list by specific list?
