| Description | | |
| On https://github.com/Katello/katello/blob/master/app/models/katello/repository.rb#L90 repository model has code that looks like => alias_attribute :url, :feed And the controllers return "url" instead of "feed". This creates an inconsistency between the data model and the controllers. We need to address this by migrating the model from feed => url and change the place in code where "feed" is used. | | |

Revision e67cfb73 - 07/28/2014 02:42 PM - Partha Aji

Fixes #6097,bz1120427 - repository.feed -> repository.url

Migrating a repository data model attribute from feed to url. The word feed applies to the feed url used by pulp, but in katello UI, CLI and API we consistently use url for feed. To mitigate this confusion it was deemed to rename feed to url.
