

Foreman - Bug #6099

New Host screen is eating Fog Errors

06/06/2014 05:21 PM - Bryan Kearney

Status:	Closed

Target version:	1.6.0	
Difficulty:	easy	Fixed in Releases:
Triaged:		Found in Releases: Nightly
Bugzilla link:	1105674	Red Hat JIRA:
Pull request:		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1105674
See https://bugzilla.redhat.com/show_bug.cgi?id=1105671.

I mis-configured the ami for my compute resource. When I attempted to create a new host I briefly saw an error, but then the screen was redirected. The only way to debug the issue was to look at the logs. I would have expected an error message on the screen which gave me the error condition.

The actual logs are attached. Per Greg, the error message was

```
"Fog error: The image id '[ami-e08efbd0]' does not exist"
```

```
