Katello - Bug #6103

Package Profile only uploaded every 4 hours

06/06/2014 06:29 PM - Justin Sherrill

Status:	Closed		
Priority:	Normal		
Assignee:	Justin Sherrill		
Category:	Client/Agent		
Target version:	Katello 2.0		
Difficulty:	easy	**Fixed in Releases:**	
Triaged:	Yes	**Found in Releases:**	
Bugzilla link:	1103937	**Red Hat JIRA:**	
Pull request:			

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1103937
Description of problem:
Currently the package profile of a system is only updated every 4 hours. This means you can:

- Install a package
- uninstall a package
- install an errata

and you will not see the action reflected in the system package profile or applicable errata list until up to 4 hours later.

Additional info:

Satellite 5 provided this information instantly.

Revision a9a4688c - 06/06/2014 05:41 PM - Justin Sherrill

fixes #6103 - updating package profile after every yum action

This commit does two things: * Adds a yum plugin 'package_upload' which sends the package profile up
after every yum rpm transaction. So this handles yum actions initiated
from katello and actions run on the client using 'yum'   * Includes a new executable 'katello-package-upload which force pushes the package profile
