

Katello - Bug #6129

/katello/api/status neglects to report all of the fields that /candlepin/status reports

06/09/2014 08:25 PM - Christine Fouant

| Bugzilla link: 1097875 | Red Hat JIRA: |
| Pull request: https://github.com/Katello/katello/pull/4236 | |
| Description | |
| <p>Description of problem: When calling the API /status against a katello server versus a plain candlepin server, I noticed that katello hides some data. I'm not 100% sure if the missing fields are needed by subscription-manager clients anymore. Nonetheless, the katello API for /status could probably open this up a little.</p> <p>Status response from a Katello Server..... [root@jsefler-5 ~]# curl --stderr /dev/null --insecure --request GET https://katellosach.usersys.redhat.com:443/katello/api/status python -msimplejson/tool { "release": "Katello", "result": true, "standalone": true, "timeUTC": "2014-05-14T04:17:44Z", "version": "1.4.15-1.el6" }</p> <p>Status call from a Candlepin Server.... [root@jsefler-5 ~]# curl --stderr /dev/null --insecure --request GET https://jsefler-f14-candlepin.usersys.redhat.com:8443/candlepin/status python -msimplejson/tool { "managerCapabilities": ["cores", "ram", "instance_multiplier", "derived_product", "cert_v3", "guest_limit", "vcpu"], "release": "1", "result": true, "rulesSource": "DATABASE", "rulesVersion": "5.8", "standalone": false, "timeUTC": "2014-05-14T16:22:41.543+0000", "version": "0.9.10" }</p> <p>Notice that the following fields are missing from Katello: managerCapabilities rulesSource rulesVersion</p> | |
