Foreman - Bug #6160

False positive validation prevents saving network provisioned host with compute profile with image

06/11/2014 11:03 AM - Ivan Necas

Status:	Closed		
Priority:	Normal		
Assignee:	Ivan Necas		
Category:	Host creation		
Target version:	1.5.2		
Difficulty:		**Fixed in Releases:**	
Triaged:		**Found in Releases:**	
Bugzilla link:	1111593	**Red Hat JIRA:**	
Pull request:			

Description

1. add image to libvirt resource
2. create a compute profile for libvirt, include the image (doesn't seem to be have nothing selected)
3. perform network based provisioning
4. the the provisioning calls foreman at the end, it fails on

`"Selected image does not belong to localhost (Libvirt)"]}"`

The problem with image not being find in the compute resource was caused by http://projects.theforeman.org/issues/6159

However, there is no reason to do this validation for build-based provisioning.
