Target version:	
Difficulty: medium	Fixed in Releases:
Triaged: Yes	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description On host creation we would like to be able to add VMware tags (http://pubs.vmware.com/vsphere-51/index.jsp?topic=%2Fcom.vmware.vsphere.vcenterhost.doc%2FGUID-05323758-1EBF-406F-99B6-B1A33E893453.html) so we can perform searches/reporting based on those tags in Vcenter

History

#1 - 09/26/2014 07:03 AM - Dominic Cleal

- Category changed from Compute resources to Compute resources - VMware

#2 - 04/13/2015 04:00 AM - Dominic Cleal

- Has duplicate Feature #10121: Support for Tags in VMware vSphere added

#3 - 05/06/2015 03:48 AM - Bill Elliott

Is there a possibility to accelerate the implementation of this feature by contributing to the project? Is there a defined hourly-rate for such support?

#4 - 05/06/2015 04:56 AM - Dominic Cleal

The project doesn't have any mechanisms for paid work, but it's possible you might want to try a site like <https://www.bountysource.com/> and post about it on foreman-dev in case there's somebody with the skills who wants to work for it.

Hi,
Is it now possible to add Tags to Wcenter from Foreman ?
Thanks

#6 - 07/06/2018 12:31 PM - Milosz T

- Triaged set to No

Is there any update here?

#7 - 07/10/2018 01:58 PM - Chris Roberts

- Difficulty set to medium
- Triaged changed from No to Yes

#8 - 07/10/2018 01:59 PM - Chris Roberts

This is a valid feature so marking as Triaged. Setting to backlog at the moment.

Any news on this feature ?

#10 - 08/21/2020 11:04 AM - Adam Winberg

This would be helpful for us too, we are currently managing tags via foreman hooks but it would be much nicer to have Foreman do it directly. It would also be nice to be able to read tags for a server via Foreman API.
