Revision 4e31fda9 - 06/16/2014 01:28 PM - David Davis

Fixes #6211,BZ1102521 - Requiring a user to ping pulp_auth

It looks like the code didn't properly set User.current so Katello.pulp_server was nil. This code checks for a user in the controller. Also, it handles the case of no user by skipping the pulp_auth check which needs remote_id from a user.
