

## Katello - Bug #6221

### 400 Bad request on clicking links under "Host Collections"--> "Collection Actions"

06/13/2014 08:53 PM - Eric Helms

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> Eric Helms	
<b>Category:</b> Web UI	
<b>Target version:</b> Katello 2.0	
<b>Difficulty:</b> medium	<b>Fixed in Releases:</b>
<b>Triaged:</b> Yes	<b>Found in Releases:</b>
<b>Bugzilla link:</b> 1104991	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1104991">https://bugzilla.redhat.com/show_bug.cgi?id=1104991</a>	
Description of problem: I was verifying bz #1096183. And found that clicking on following two links under "Host Collections"--> "Collection Actions" raises 400 Bad request error in production.log and page remains in loading state.	
And error is also misleading as it says:	
Processing by Katello::Api::V2::SystemsController#index as JSON Parameters: {"organization_id"=>"1", "page"=>"1", "search"=>"host_collection:'tests'", "sort_by"=>"name", "sort_order"=>"ASC", "api_version"=>"v2"} Katello::HttpErrors::BadRequest: No systems have been specified.	
I've already added one content-host in host-collection.	
Version-Release number of selected component (if applicable): Verified with sat6 beta snap8 (Satellite-6.0.3-RHEL-6-20140604.0)	
How reproducible: always	
Steps to Reproduce: 1. Create a host-collection 2. Add a content-host to created host-collection in step1 3. Now Go to "Host Collections"--> "Collection Actions" tab and select following links:	
- Errata Installation - Host Collection Membership	
4. Check production.log	
Actual results: Links opened up "content host" page but it remains in loading state, and a long exception thrown in production.log with 400 bad request.	
Expected results: Page shouldn't be in loading state and no exception should be in production.log	
Additional info: Please see attachments.

#### Associated revisions

Revision 018d8156 - 06/16/2014 10:11 AM - Eric Helms

Fixes #6221: Content host errata and host collection bulk actions no longer 400.

Content host errata and host collection bulk actions when entered via host collection links would throw 400 errors and display no results. This was due in part to attempting to fetch errata without content hosts populated and the parameter to disable initial errata loading incorrectly specified.

Also, this changes the way search works on nutupane instances by using 'search' as the default in the URL unless an action was supplied to Nutupane. If the action is supplied, for example 'availableErrata', then the search term becomes 'availableErrataSearch'. This has the effect of fixing the coupling of multiple nutupane search boxes to one another.
