Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1110012
Description of problem:

Synchronized RHEL 5Server RPMs for x86_64 and a custom yum repo pointing to the katello-agent. Added them both to a content view, added a puppet module from a third custom puppet repo and published/promoted to DEV environment (Library + 1). Created second custom repo pointing to same yum content, synchronized it. Edited the content view by removing the old custom repo and adding the new one. Published a second version of the content view and promoted it to DEV again.

I then tried to use the CLI to remove/delete version 1 of this content view, which then raised the following error:

```
undefined method `search_type' for Katello::PuppetModule:Class
```

The UI shows that the version 1 was deleted but I'm filing this for future investigation.
