Pull request:	
Description	
Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1087079	
Description of problem:	
Got to Hosts/Registered Systems and select some systems.	
Choose Bulk Actions	
Go to Errata	
Search for an erratum	
- I tried to find all RHSA errata, for instance, so I plugged in rhsa, rhsa*, RHSA, RHSA*, and every other combination of wildcards I could think of. Nothing shows up	
- Then I tried by package name. I know there's an update for dmidecode, so I plugged in dmidecode, dmidecode*, dmidecode-* and other combinations. Nothing shows up.	
It appears that all you can do is scroll down and check the box next to errata. Search does not appear to work.
